

**CHAPTER 8  
PORTS**

**ARTICLE 1  
FINDINGS AND GENERAL PROVISIONS**

**Section**

- 30700 Ports included
- 30700.5 Application of other provisions
- 30701 Legislative finding and declaration

**ARTICLE 2  
POLICIES**

**Section**

- 30702 Public policy
- 30703 Protection of commercial fishing harbor space
- 30705 Diking, filling or dredging water areas
- 30706 Fill
- 30707 Tanker terminals
- 30708 Location, design and construction of port related developments

**ARTICLE 3  
IMPLEMENTATION: MASTER PLAN**

**Section**

- 30710 Jurisdictional map; map delineating wetland, estuary or recreational areas
- 30711 Preparation and contents of plan
- 30712 Solicitation of information; notice of completion; public hearing
- 30713 Repealed
- 30714 Adoption of plan; certification
- 30715 Permit authority; appealable approvals
- 30715.5 Finding of conformity
- 30716 Amendment; Commission certification; minor or de minimis amendment procedure; guidelines
- 30717 Approval of appealable development; notice effective date; appeals
- 30718 Nonappealable developments; environmental impact reports
- 30719 Projects deemed certified
- 30720 Judicial prohibition or stay; reinstatement of permit authority
- 30721 Port Hueneme reimbursement costs

## ARTICLE I FINDINGS AND GENERAL PROVISIONS

### **Section 30700 Ports included**

For purposes of this division, notwithstanding any other provisions of this division except as specifically stated in this chapter, this chapter shall govern those portions of the Ports of Hucneme, Long Beach, Los Angeles, and San Diego Unified Port District located within the coastal zone, but excluding any wetland, estuary, or existing recreation area indicated in Part IV of the coastal plan.

(Amended by Ch. 714, Stats. 1981.)

### **Section 30700.5 Application of other provisions**

The definitions of Chapter 2 (commencing with Section 30100) and the provisions of Chapter 9 (commencing with Section 30800) and Section 30900 shall apply to this chapter.

### **Section 30701 Legislative finding and declaration**

The Legislature finds and declares that:

(a) The ports of the State of California, including the Humboldt Bay Harbor, Recreation, and Conservation District, constitute one of the state's primary economic and coastal resources and are an essential element of the national maritime industry.

(b) The location of the commercial port districts within the State of California, including the Humboldt Bay Harbor, Recreation, and Conservation District, are well established, and for many years such areas have been devoted to transportation and commercial, industrial, and manufacturing uses consistent with federal, state and local regulations. Coastal planning requires no change in the number or location of the established commercial port districts. Existing ports, including the Humboldt Bay Harbor, Recreation, and Conservation District, shall be encouraged to modernize and construct necessary facilities within their boundaries in order to minimize or eliminate the necessity for future dredging and filling to create new ports in new areas of the state.

(Amended by Ch. 515 Stats. 1977.)

## ARTICLE 2 POLICIES

### **Section 30702 Ports included**

For purposes of this division, the policies of the state with respect to providing for port-related developments consistent with coastal protection in the port areas to which this chapter applies, which require no commission permit after certification of a port master plan and which, except as provided in Section 30715, are not appealable to the commission after certification of a master plan, are set forth in this chapter.

### **Section 30703 Protection of commercial fishing harbor space**

The California commercial fishing industry is important to the State of California; therefore, ports shall not eliminate or reduce existing commercial fishing harbor space, unless the demand for commercial fishing facilities no longer exists or adequate alternative space has been provided. Proposed recreational boating facilities within port areas shall, to the extent it is feasible to do so, be designed and located in such a fashion as not to interfere with the needs of the commercial fishing industry.

**Section 30704** Blank

**Section 30705** Diking, filling or dredging water areas

(a) Water areas may be diked, filled, or dredged when consistent with a certified port master plan only for the following:

(1) Such construction, deepening, widening, lengthening, or maintenance of ship channel approaches, ship channels, turning basins, berthing areas, and facilities as are required for the safety and the accommodation of commerce and vessels to be served by port facilities.

(2) New or expanded facilities or waterfront land for port-related facilities.

(3) New or expanded commercial fishing facilities or recreational boating facilities.

(4) Incidental public service purposes, including, but not limited to, burying cables or pipes or inspection of piers and maintenance of existing intake and outfall lines.

(5) Mineral extraction, including sand for restoring beaches, except in biologically sensitive areas.

(6) Restoration purposes or creation of new habitat areas.

(7) Nature study, mariculture, or similar resource-dependent activities.

(8) Minor fill for improving shoreline appearance or public access to the water.

(b) The design and location of new or expanded facilities shall, to the extent practicable, take advantage of existing water depths, water circulation, siltation patterns, and means available to reduce controllable sedimentation so as to diminish the need for future dredging.

(c) Dredging shall be planned, scheduled, and carried out to minimize disruption to fish and bird breeding and migrations, marine habitats, and water circulation. Bottom sediments or sediment elutriate shall be analyzed for toxicants prior to dredging or mining, and where water quality standards are met, dredge spoils may be deposited in open coastal water sites designated to minimize potential adverse impacts on marine organisms, or in confined coastal waters designated as fill sites by the master plan where such spoil can be isolated and contained, or in fill basins on upland sites. Dredge material shall not be transported from coastal waters into estuarine or fresh water areas for disposal.

(d) For water areas to be diked, filled, or dredged, the commission shall balance and consider socioeconomic and environmental factors.

(Amended by Ch. 310, Stats. 1984.)

**Section 30706** Fill

In addition to the other provisions of this chapter, the policies contained in this section shall govern filling seaward of the mean high tide line within the jurisdiction of ports:

(a) The water area to be filled shall be the minimum necessary to achieve the purpose of the fill.

(b) The nature, location, and extent of any fill, including the disposal of dredge spoils within an area designated for fill, shall minimize harmful effects to coastal resources, such as water quality, fish or wildlife resources, recreational resources, or sand transport systems, and shall minimize reductions of the volume, surface area, or circulation of water.

(c) The fill is constructed in accordance with sound safety standards which will afford reasonable protection to persons and property against the hazards of unstable geologic or soil conditions or of flood or storm waters.

(d) The fill is consistent with navigational safety.

**Section 30707 Tanker terminals**

New or expanded tanker terminals shall be designed and constructed to do all of the following:

(a) Minimize the total volume of oil spilled.

(b) Minimize the risk of collision from movement of other vessels.

(c) Have ready access to the most effective feasible oil spill containment and recovery equipment.

(d) Have onshore deballasting facilities to receive any fouled ballast water from tankers where operationally or legally required.

**Section 30708 Location, design and construction of port-related developments**

All port-related developments shall be located, designed, and constructed so as to:

(a) Minimize substantial adverse environmental impacts.

(b) Minimize potential traffic conflicts between vessels.

(c) Give highest priority to the use of existing land space within harbors for port purposes, including, but not limited to, navigational facilities, shipping industries, and necessary support and access facilities.

(d) Provide for other beneficial uses consistent with the public trust, including, but not limited to, recreation and wildlife habitat uses, to the extent feasible.

(e) Encourage rail service to port areas and multicompany use of facilities.

**ARTICLE 3  
IMPLEMENTATION: MASTER PLAN**

**Section 30710 Jurisdictional map; map delineating wetland, estuary or recreational areas**

Within 90 days after January 1, 1977, the commission shall, after public hearing, adopt, certify, and file with each port governing body a map delineating the present legal geographical boundaries of each port's jurisdiction within the coastal zone. The Commission shall, within such 90-day period, adopt and certify after public hearing, a map delineating boundaries of any wetland, estuary, or existing recreation area indicated in Part IV of the coastal plan within the geographical boundaries of each port.

**Section 30711 Preparation, adoption and contents of plan**

(a) A port master plan that carries out the provisions of this chapter shall be prepared and adopted by each port governing body, and for informational purposes, each city, county, or city and county which has a port within its jurisdiction shall incorporate the certified port master plan in its local coastal program. A port master plan shall include all of the following:
